

Bridging the Gap

A true go-anywhere RV, the Crossover will bring the comfort of home on your next off-road adventure

Melbourne-based Vista RV calls their unique off-road RV the Crossover, and it takes the best elements of an off-road caravan and combines it with the best features of a camper trailer to create an RV with the best of both worlds. Vista RV started in 2006 with an aim to build an off-road RV that could follow a 4WD any-

where, but also provide all the creature comforts without having to rough it under canvas.

Whilst an off-road caravan will take you to a lot of great places, the Vista RV Crossover is designed to go much further and follow you to those places that a traditional RV could only dream of going. Thanks to its compact dimensions, the Vista RV will tuck neatly behind your tow vehicle making it a very fuel

efficient RV to tow, and it doesn't miss out on storage space either thanks to its clever packaging.

For those who truly want to go anywhere (and we mean anywhere) in this beautiful country, the Vista RV Crossover will get you there and back in comfort. With the Crossover being such a great success, Vista RV aren't resting on their laurels. Soon they will be revealing their new 'baby' Crossover, so keep an eye out.

EXTERNAL FEATURES

CHASSIS: Full steel jig welded box tube
STEEL PROTECTION: Hot dip galvanised
SUSPENSION: MS Series independent suspension
CONFIGURATION: Coil sprung unequal length trailing arm
FRAME CONSTRUCTION: Steel, fibreglass and vacuum pressed composite panels

EXTERNAL POWER OUTLETS: 2x 12v outlets
EXTERNAL CAMP LIGHTS: Yes, 1x LED bar light
JOCKEY WHEEL PLACEMENT: Centre A-frame
GENERATOR: No

The Crossover's unique design makes it aerodynamically efficient, which means you use less fuel to tow it. Its compact external dimensions allow the Vista RV to fit neatly behind your tow vehicle; this also allows it to fit inside a standard garage when not in use. An optional cover is available to protect your Crossover from the elements. It even has a zip-out panel so the cover can be in use when you're using the Vista.

The Crossover comes standard with this triangular sail awning, as well as the option of a full tent annex and ensuite. It's easy to see from this view that the ground clearance on offer makes the Vista a serious off-road RV.

Here's one of the really unique features on the Vista RV Crossover. This is Vista's MS Series independent suspension, and thanks to the design and engineering that has gone into it, the MS Series setup allows the Crossover to literally follow you anywhere. This setup gives the Vista RV the benefits of true straight line tracking, meaning you steer the Vista and not vice-versa. There's also up to 13 inches of wheel travel on offer thanks to the MS Series suspension. Vista RV ensures a smooth ride by only using high-quality King springs and Koni shocks.

INTERNAL FEATURES

FRIDGE: 80L Waeco fridge/freezer
SINK: 2x single bowl stainless steel
MUSIC SYSTEM: Axis AM-FM radio and CD/MP3 player

UPHOLSTERY: Cloth fabric
SLEEPING CONFIGURATION: Folding mattress at front
BERTHS: Two
BED SIZE(S): Queen Size
MATTRESS: Foam, optional innerspring
UNDERBED STORAGE: No
PRIVACY SCREENS: No

The interior of the Crossover provides all the essential comforts of home, like a full size queen bed and an upright fridge/freezer. The bed folds away during the day to reveal chairs and a table. The table is gas assisted, so when it's in the down position all it takes is a twist of a knob and the table brings itself up to full height. With the pop-top up there is plenty of headroom and extra light provided by the mesh windows. A hatch at the front of the Crossover allows for cross-ventilation, perfect for those balmy summer nights.

Every Vista RV Crossover comes with LT265/75 R16 Cooper Discoverer S/T All-Terrain tyres fitted standard. This means that the Crossover is ready for adventure straight off the showroom floor. Those Coopers are wrapped around a set of tough six-stud 16in steel rims which are slowed down by a pair of heavy-duty electric off-road brakes.

There's ample storage on the Vista RV. These two lockers are joined by a double jerry can holder (hidden behind the locker door in this image), a larger locker up front and a boot on the draw bar, another hidey hole under the nose cone, two more jerry can holders and two 4.5kg gas bottle holders. All up there is 1,871 litres of combined storage space! If you can't find somewhere to put it in the Crossover, you're packing too much.

At the rear of the cabin you'll find more bench space and a second sink with another pressurised tap. A Waeco 80L fridge/freezer takes care of your food and beverages and a CD player/AM-FM radio keeps you entertained. There's plenty of storage space inside and outside of the Crossover and the cupboard on the left of frame even allows you to hang up some of your clothes.

MANUFACTURER: Vista RV

The external slideout kitchen has a full stainless steel construction and features a twin burner gas stovetop and a stainless steel sink with a pressurised tap. There are also two drawers for storing all your cutlery and cooking utensils and there's ample bench space for preparing any meal.

The Vista RV features two pressurised water taps and there's this hand pump tap that allows you to save power. And, if the worst happens and for some unexpected reason you're without power, you'll still have access to fresh drinking water. All the taps are connected to an 87L water tank mounted underneath the Crossover and there's an additional 87L tank available as an option.

All the switches and monitoring systems are easy to find and clearly labeled. In terms of power, the Crossover comes standard with a 100ah deep cycle battery that charges itself when the Crossover is connected to your tow vehicle. However, you do have the option of adding a second battery, a charger and an 85w solar panel, which allows the Crossover to become even more self-sufficient. There are four 240v outlets scattered throughout the Vista and two external 12v outlets.
