

# SPANNING Boundaries

Open up your touring options with an RV that can double as on-road tourer and off-road adventurer

Sometimes in life we want to do it all, and sometimes we can. While you might be desperate to get to some of the most isolated touring locations on the RV map, your travelling companions may be just as happy cruising the Great Ocean Road. The key to a successful RV trip is to be versatile and flexible. The TVK from

Vista RV Crossover is a great example of an RV that is capable in both on-road and off-road scenarios, as the name implies, and is a real workhorse that's capable of keeping even the most fastidious of campers satisfied.

By utilising a number of composite materials, the team at Vista RV Crossover has managed to create a durable and compact

shell that's ready to tackle any RV adventure, while providing all of the comfort you could need on any trip. They have also managed to couple this with their MS series suspension, which has 330mm of travel, ready to take on the weight of your travelling gear while remaining smooth and confident, no matter how arduous the conditions you're travelling on are.

One of the advantages of travelling with the TVK is its towing mannerisms. By packing down to a small size, the TVK can be towed behind a range of vehicles while remaining hardly noticeable to the driver. Coupled with the Vista RV Crossover suspension system, it's a great choice for extended trips over rugged terrain.

An awning keeps the sun off you, which is great for summer travel. The main access door is located on the side and folds right back onto the body of the van, to ensure it doesn't get in the way of the activities that are sure to occur around the area.

The front end of the TVK looks as much like a fighter jet as it does an RV. Further storage boxes are included to carry the bulkier goods that may not fit inside the van or in your tow vehicle while travelling, and a hatch is included on the roof. The hatch is a further extension of the mosquito netting element of the design, and ensures nobody overheats while trying to sleep at night.

## EXTERNAL FEATURES

**FRAME CONSTRUCTION:** Jig assembled and hot dip galvanised  
**OUTER SKIN:** Fibreglass, composite materials and pressed sheet metal inserts  
**INSULATION:** Vacuum-pressed side panelling with additional layers  
**WATER TANKS:** 87L  
**WHEELS:** 16 x 8 white six stud

**CABINetry:** Timber finish  
**LOUNGE:** Dinette style with table  
**SWIVEL SEATS:** N/A  
**SLEEPING CONFIGURATION:** Queen mattress – sleeps two  
**BERTHS:** Two  
**MAIN BED:** Queen bed  
**PRIVACY SCREENS:** Yes – front door and at roof expansion area  
**BATHROOM CONFIGURATION:** N/A  
**PRIVACY DOOR:** Yes – front door  
**TOILET:** N/A  
**SHOWER HEAD:** N/A

A table provides a good space to eat your meals or relax if the weather turns bad outside. Note the polyester headlining that acts as an insulator and keeps condensation at bay. It's features like this that really mean the TVK is ready for harsh conditions found in the more remote spots around Australia.

To ensure there is plenty of internal space once the Crossover is parked, the roof lifts on gas struts. Mesh screening ensures the mosquitoes are kept out, yet the breeze is kept in thanks to the material's breathable nature. You can also see here a solar panel and sizable external storage compartments that are included as standard to make the TVK feel just like home.

The circuit breaker, fuses and other electrical componentry are housed in this secure space behind a closed door. Electricals are paramount in the running of any RV, so it is of vital importance to have them housed in a secure location such as the spot the team opted for on the TVK.

The kitchen slides out from the side of the van's body. The key with the TVK is in its design. Compact in space allowances, the team at Vista RV Crossover has more than provided for the needs of any traveller, by utilising the external space on the TVK as efficiently as possible. A two-burner gas stove and a stainless steel sink make preparing meals easy and the whole set-up can slide straight back into the van when not in use.

### UNIQUE SELLING POINTS

- MS SUSPENSION SYSTEM
- STRONG COMPOSITE BODY
- CONVERTIBLE DINETTE
- HIGH LEVEL OF OFF-ROAD ABILITY
- LIFT-UP ROOF

### TECHNICAL SPECS

**MAKE/MODEL:** Vista RV Crossover TVK  
**EXTERNAL BODY LENGTH:** 4500mm  
**EXTERNAL WIDTH:** 1900mm  
**EXTERNAL HEIGHT:** 2080mm  
**TARE WEIGHT:** 1055kg  
**BALL WEIGHT:** 170kg  
**ATM:** 1600kg  
**RRP:** Starting from \$50,800

The TVK is constructed from a composite of materials designed to provide plenty of resistance to the harsh nature of off-road travel. Pop rivets are used to reinforce the construction of the outer shell. As space runs at a premium in such a compact unit, you can also see that Vista RV Crossover has designed plenty of external compartments to house all the running gear of the RV.

The underbody is where the TVK really shines. Constructed with the avid outback tourer in mind, all of the componentry has been thoroughly tested and constructed to ensure there are no unexpected breakdowns in the middle of nowhere. The Vista RV Crossover suspension system is at the heart of it all, providing a smooth and safe ride for the van regardless of how rough the roads get.

**SAVE \$500!** **SPECIAL OFFER**

Contact Loraine and Louis at Vista RV and mention this Caravan and Motorhome special offer when ordering your new Crossover TVK, to receive a free Coleman hot water on demand system, normally valued at \$500! Offer only valid until 11/2/2012.
